Dick,

Could you give me a call?

Mike Cirian, PE
Libby On-site Project Manager
US EPA

Denise,
I will call Susan back to make contact and give her a brief project update.
Thanks for passing this on.
Dick

All:

I will call her back and ask that she coordinate with Mike. Please let me know if you need info on state superfund's fill sampling requirements.

Denise

I think she should contact Mike Cirian at EPA, he is the Remedial Project Manager for the CFAC site and would be the one to make the approval.

Mike's email is Cirian.Mike@epa.gov

Mike's phone is 406-293-6194

He is cc'd here, so he will know this is coming. Mike's should state the specifications if this is within the Operable Unit boundaries.

Tom

Subject: CFAC - Voice Mail Message

Dick:

I have a voice-mail message from Susan Nicosia (406-892-4384) with the City of Columbia Falls. Susan has my contact info from when Rob Parker and I were meeting with her/others regarding site assessment results and possible NPL listing. Her message says that the City has been working with FWP on a project where they have some excess fill material that they have offered to Cliff at Calbag. He indicated to her that there are significant sampling requirements for any fill used at CFAC, but she wanted to clarify that the material the City has offered is from pastureland. I am happy to call her back and share what state superfund has on our frequently asked questions (FAQ) page, but I am not familiar with your project requirements. Please let me know if you would like for me to share FAQ information or if you will call her back to have a more project-specific discussion.

Denise
